

Two friends meet and decide to go cycling on the weekends.

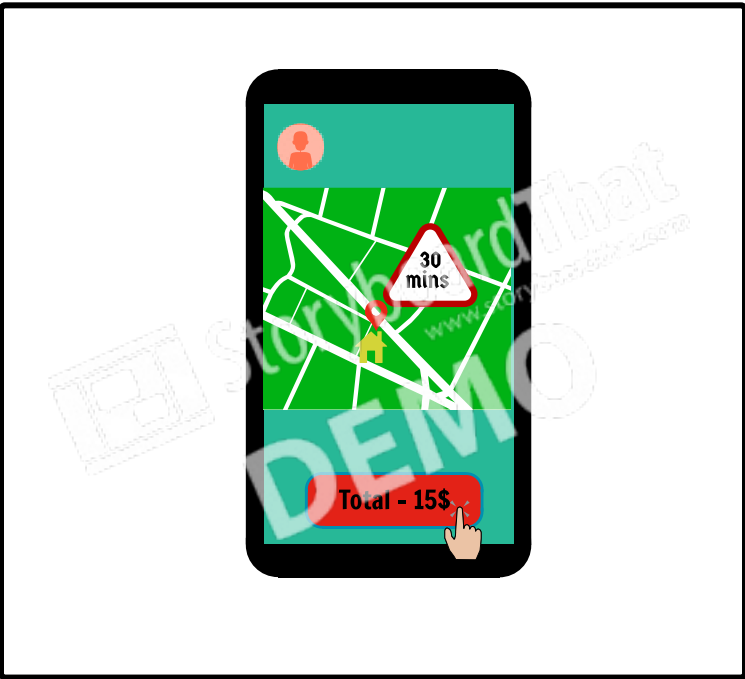

Friend opened 'Cycloze' app and rented 2 cycles.

On the day of their ride the cycles were delivered at their residence.

Both the friends were enjoying and spending quality time together.

They reached home and returned their cycles and opened the app to pay the total fees (2 hrs + extra 30 mins).

After successfully paying the fees, the users are asked for their feedback regarding their ride and service provided.
